Title: **Challenges in Data Management
and Path Towards Self-Service**

Speaker: **CHINTAN DIXIT**
**Sr. Data Architect, Enterprise e-Support Inc.,
Lorton, VA**

Hosted by: Pradeep Atrey

Abstract: Self-service is a win-win scenario for organizations and their customers. It is however a challenge for organizations to enable self-service for their business users and customers. Identification of inhibitors in data management and applying best practices for remediation has not been very well understood. The challenge of data management has also grown many folds as customers embrace new self-serving technology, generate data and interact with organization in new ways.

Speaker's brief bio: Chintan Dixit is a Sr. Data Architect at Enterprise e-Support Inc. He has 26 years of experience in information technology area, primarily information management with a focus on data architecture and governance.
