Read pages 1 through 40 in MOS. During or after your reading, write a response as directed for EACH of the exercises 1-15. Feel free to upgrade your answers, but a response to each question MUST be turned in at the beginning of next class.

This is survey, study guide and graded exercise. You are not expected to solve each problem completely at this time in the course. 3 points for a reasonably correct answer, 2 points for a good solution plan, 1 points for a good question about the question.
